TITLE : MOUSE HAVING MODIFIED GAS6 GENE

ABSTRACT : PROBLEM TO BE SOLVED: To obtain a mouse having a Gas6 gene modified so as not to express a Gas6 protein, and used as a laboratory animal for study such as elucidation of pathophysiology and cause of circulatory system, respiratory system, central nervous system and immune system diseases a related to Gas6, and development of a method for treatment thereof.

SOLUTION: This mouse having Gas6 gene including a neomycin resistance gene inserted in the Gas6 gene region and modified so as not to express a Gas6 protein is obtained by substituting a region including the first and the second exons of the Gas6 gene with the neomycin resistance gene.
